

# Protecting your farm from **FERAL PIGS**

**Feral pigs - they're a relentless pest that damage crops, property and the environment and are a likely vector for Panama TR4.**

**Taking a proactive approach towards managing feral pigs on your property is crucial to help curb their rapidly growing numbers.**

Here are five approaches you can take to managing feral pigs:

- Aerial shooting
- Trapping - [apply for a Cassowary Coast Regional Council trap](#)
- On ground shooting
- Exclusion fencing
- Baiting - [1080 baiting is available through Cassowary Coast Regional Council](#)

**Feral pigs multiply quickly**

**Take action against feral pigs on your property**

**Reach out to get help**

Cassowary Coast Regional Council can assist landowners to control Feral Pigs by loaning a pig trap or with 1080 baiting.

More [Landholder Information](#) and a [Trapping Guide](#) are available online.
